## CUMULATIVE TABLE OF CONTENTS

### Number 1 CONTACT PHASE COAGULATION DISORDERS Christine H. Mannhalter, Ph.D.

- Structural and Functional Characterization of Factor XII**, Guido Tans and Jan Rosing, 1
- Role of High Molecular Weight Kininogen in Contact Activation**, Freek van Iwaarden and Bonno N. Bouma, 15
- Biochemical and Functional Properties of Factor XI and Prekallikrein**, Christine H. Mannhalter, 25
- Contact Factors in Health and Disease**, Hidehiko Saito, 36
- Role of the Contact System in Fibrinolysis**, Cornelis Kluff, Gerard Dooijewaard, and Jef L. Emeis, 50
- Major Inhibitors of the Contact Phase Coagulation Factors**, Marc Schapiro, 69
- The Importance of Surfaces in Contact Phase Reactions**, Leo Vroman, 79

- Platelet-Mediated Trigger Mechanisms in the Contact Phase of Blood Coagulation**, Peter N. Walsh, 86
- Interaction of Polymorphonuclear Cells with Contact Activation Factors**, Ellen J. Gustafson and Robert W. Colman, 95
- Immunoblotting Studies of Coagulation Factor XII, Plasma Prekallikrein, and High Molecular Weight Kininogen**, Bernard Lämmle, Mauro Berrettini, and John H. Griffin, 106
- Novel Functions of the Kininogens**, Werner Müller-Esterl, 115
- Abstracts of Current Literature**, Genesio Murano and Rodger L. Bick, Editors, 127

### Number 2 THROMBOLYTIC AGENTS AND TREATMENTS Meyer M. Samama, M.D., Ph.D.

- Comparison of Plasminogen Activators**, Kenneth C. Robbins, Grant H. Barlow, Genevieve Nguyen, and Meyer M. Samama, 131

- Acyl Enzymes for Thrombolytic Therapy**, Isobel D. Walker and John F. Davidson, 139
- Fibrin Binding and Zymogenic Properties of Single-Chain Urokinase (Pro-urokinase)**, Victor Gurewich and Ralph Pannell, 146
- Single-Chain Urokinase-Type Plasminogen Activator: Mechanism of Action and Thrombolytic Properties**, H. Roger Lijnen, David C. Stump, and Désiré C. Collen, 152
- Optimal Dosage Regimens of Tissue-Type Plasminogen Activator**, Giancarlo Agnelli and Jack Hirsch, 160
- Controversies of Different Regimens of Thrombolytic Therapy in Acute Pulmonary Embolism**, Giuseppe Cella Antonio Palla and Arthur A. Sasahara, 163
- Perspectives on Treatment of Acute Pulmonary Embolism with Tissue Plasminogen Activator**, Samuel Z. Goldhaber, John E. Markis, Craig M. Kessler, Michael F. Meyerovitz, Ducksoo Kim, Douglas E. Vaughan, Andrew P. Selwyn, Joseph Loscalzo, Douglas L. Dawley, G.V.R.K. Sharma, Arthur Sasahara, Elliott B. Grossbard, and Eugene Braunwald, 171
- Deep Vein Thrombosis of Inferior Limbs: Are Thrombolytic Agents Superior to Heparins?**, Meyer M. Samama, 178
- Dose-Effect Relationship Estimation for Thrombolytic Therapy in Acute Myocardial Infarction**, Jean-Pierre Boissel, Alain Leizorovicz, and Jean-Claude Peyrieux, 181
- Thrombolytic Treatment in Acute Myocardial Infarction**, Jean Acar, Alec Vahanian, Pierre-Louis Michel, and Véronique Roger, 186
- Thrombolytic Treatment of Acute Thrombotic Obstruction with Disk Valve Prostheses: Experience with 26 Cases**, Marie-Françoise Lorient Roudaut, Louis Ledain, Raymond Roudaut, Pierre Besse, and Michel R. Boisseau, 201
- Local Low-Dose Thrombolysis in Arterial Disease of the Limbs**, Raymond Verhaeghe, Guy Wilms, and Joseph Vermynen, 206
- Theoretic and Practical Considerations on Laboratory Monitoring of Thrombolytic Therapy**, Jacqueline Conard and Meyer M. Samama, 212
- Specific Determination and Identifications of Cross-Linked Fibrin Degradation Products in Patients Under Thrombolytic Therapy for Myocardial Infarction**, Jeannette Soria, Claudine Soria, Manouchehr Mirshahi, Massoud Mirshahi, Meyer M. Samama, and Jacques P. Caen, 223
- Abstracts of a Symposium on "Factor VIII/von Willebrand Factor, Platelet Formation, and Function in Health and Disease: A Tribute to Dr. Marion I. Barnhart"**, 228
- Abstracts of Current Literature**, Genesio Murano and Rodger L. Bick, Editors, 238

### NUMBER 3 THROMBOSPONDIN

Daniel A. Walz and T. Kent Gartner

- Structural Organization of the Thrombospondin Molecule**, Jack Lawler and Richard O. Hynes, 245
- Structure of Human Thrombospondin: Complete Amino Acid Sequence Derived from cDNA**, William A. Frazier, Vishva M. Dixit, Nancy J. Galvin, and Peter R. Rotwein, 255
- Production, Characterization, and Use of Monoclonal Antibodies Directed Against Human Blood Platelet Thrombospondin: Immunologic Comparison with Human Endothelial and Fibroblast Thrombospondins**, Philippe Clezardin, Nikolas R. Hunter, Jack Lawler, Joan Dawes, and John L. McGregor, 261
- Thiol-Disulfide Exchange by Thrombospondin**, Thomas C. Detwiler, Jed L. Turk, and Paul C. Browne, 276
- Endogenous Platelet Lectin and Thrombospondin Function**, T. Kent Gartner, 281

- Thrombospondin and the Adhesive Behavior of Platelets**, Samuel A. Santoro, 290
- Thrombospondin in Clinical Disease States**, William J. Booth and Michael C. Berndt, 298
- Mechanisms for Expression of Thrombospondin on the Platelet Cell Surface**, Martha L. Aiken, Mark H. Ginsberg, and Edward F. Plow, 307
- Binding of Thrombospondin to Immobilized Ligands: Specific Interaction with Fibrinogen, Plasminogen, Histidine-Rich Glycoprotein, and Fibronectin**, Daniel A. Walz, Theresa Bacon-Baguley, Suzanne Kendra-Franczak, and Patricia DePoli, 317
- Noncovalent and Covalent Interactions of Thrombospondin with Polymerizing Fibrin**, Marsha D. Bale, 326
- Thrombospondin-Plasminogen Interactions: Modulation of Plasmin Generation**, Roy L. Silverstein and Ralph L. Nachman, 335
- Interactions of Thrombospondin with Cells in Culture: Rapid Degradation of Both Soluble and Matrix Thrombospondin**, Joanne E. Murphy-Ullrich and Deane F. Mosher, 343
- Endothelial Cell Thrombospondin and Its Possible Role in Cell Adhesion**, Judith Lahav, Rima Dardik, and Olga Stein, 352
- Role of Thrombospondin in Hemostasis and Cell Adhesion**, George P. Tuszyński, Vicki L. Rothman, Andrew Murphy, and Karen A. Knudsen, 361
- Binding Properties of Human Thrombospondin: Interaction with Mucopolysaccharides**, Henry S. Slayter, George Karp, Barbara E. Miller, and Robert D. Rosenberg, 369
- Thrombospondin in Milk, Other Breast Secretions, and Breast Tissue**, Joan Dawes, Philippe Clezardin, and David Pratt, 378
- Abstracts of Current Literature**, Genesio Murano and Editors, 385

### Number 4 VESSEL WALL

David M. Stern, M.D. and Peter P. Nawroth, M.D.

- Endothelial Cell Procoagulant Properties and the Host Response**, Peter P. Nawroth and David M. Stern, 391
- Thrombin-Induced Intravascular Coagulation: Role in Vascular Injury**, John E. Kaplan and Asrar B. Malik, 398
- Role of Willebrand Factor in the Vessel Wall**, Philip G. de Groot and Jan J. Sixma, 416
- Inducible Endothelial Functions in Inflammation and Coagulation**, Michael P. Bevilacqua and Michael A. Gimbrone Jr., 425
- Consequences of Leukocyte-Vessel Wall Interactions in Inflammatory and Immune Reactions**, John M. Harlan, 434
- Production of Platelet-Activating Factor by Endothelial Cells**, Ralph E. Whatley, Guy A. Zimmerman, Thomas M. McIntyre, Robert Taylor, and Stephen M. Prescott, 445
- Thrombomodulin**, Naomi L. Esmen, 454
- Anticoagulant Active Heparan Sulfate Proteoglycan and the Vascular Endothelium**, James A. Marcum and Robert D. Rosenberg, 464
- Role of Heparanase in Platelet and Tumor Cell Interactions with the Subendothelial Extracellular Matrix**, Amiram Eldor, Matia Bar-Ner, Joachim Yahalom, Zvi Fuks, and Israel Vlodavsky, 475
- Regulation of Vascular Smooth Muscle Cell Growth by Heparin and Heparan Sulfates**, John J. Castellot Jr., Thomas C. Wright, and Morris J. Karnovsky, 489
- Endothelial Cell Growth Factors and the Vessel Wall**, Jacquelyn Joseph-Silverstein and Daniel B. Rifkin, 504
- Fibrinolytic Pathways and the Endothelium**, Carla M. Hekman and David J. Loskutoff, 514
- Abstracts of Current Literature**, Genesio Murano and Rodger L. Bick, Editors, 528
